

Product Instructions

CONCENTRATED FABRIC CONDITIONER

Gently softens and fragrances your clothes

Traditional fabric softener is expensive, full of chemicals and yet another thing to lug back from the supermarket. But ours is different. It's a world first – super concentrated, natural fabric conditioner.

Each bottle will last for 240 uses. That's a whole year's worth of fabric conditioner for the average family in each bottle!

Directions for use:

Our fabric conditioner is super-concentrated, so you don't need to use as much as you would normally.

- Pump 1-3 squirts directly into the fabric conditioner compartment of your washing machine drawer.
- Wash as normal.
- You can add more or less fabric conditioner, according to your preference.

Always observe the washing instructions on the labels of your garments.

Ingredients:

Cationic surfactants 5% to 15%. Also contains sorbic acid and perfume.

Precaution:

Keep out of reach of children.
